

# Fisher™ ED, EAD, and EDR Sliding-Stem Control Valves

Fisher ED, EAD, and EDR single-port control valves shown in figures 1, 2, and 3 have balanced valve plugs, cage guiding, and metal-to-metal seating for all general applications over a wide range of process pressure drops and temperatures. These general purpose, sliding-stem valves are used for either throttling or on-off control of a wide variety of liquids and gases.

The Fisher ED product line is available for a wide range of applications, including sulfide and chloride stress-cracking environments common to the oil and gas production industries. To discuss available constructions, contact your [Emerson sales office](#) and include the applicable codes and standards required for these environments.

## The easy-e™ Valve Family

ED, EAD, and EDR valves are part of the versatile easy-e family of Fisher industrial control valves. easy-e valves share the following characteristics:

- Multiple trim material choices
- Trim temperature capability with standard metal seats to 427°C (800°F)
  - FGM gaskets
- Interchangeable, restricted-capacity trims and full-size trims match variable process flow demands
- Different cage/plug styles provide particular flow characteristics for highly-specialized applications. The standard cage comes in three different flow characteristics:
  - quick-opening
  - linear
  - equal percentage

W1916-4

**FISHER ED CONTROL VALVE  
WITH 667 ACTUATOR**

- Noise in gaseous service may be attenuated by using Whisper Trim™ I, Whisper Trim III (figure 8), and WhisperFlo™ cages (figure 10)
- 316 stainless steel packing box parts are standard (including packing flange, studs, and nuts)

## Features

- **Compliance with the Clean Air Act**—Optional ENVIRO-SEAL™ packing systems (figure 6) provide an improved stem seal to help prevent the loss of process fluid. The ENVIRO-SEAL packing systems feature PTFE, Graphite ULF, or Duplex packing with live-loading for reduced packing maintenance.
- **Valve Plug Stability**— Rugged cage guiding provides high valve plug stability, which reduces vibration and mechanical noise.
- **More Flow Capacity for Initial Investment**— Streamlined flow passages in the the ED, EAD, and EDR valves provide excellent capacities and flow.
- **Balanced Valve Plug Construction**— Balanced valve plug construction permits use of smaller, lower-cost Fisher actuators. Also, trim inventory costs are cut because dimensional standardization permits use of most standard easy-e trim parts.
- **Compliance with European Standards**— Valves are available with dimensions specified by EN/DIN standards. See figure 12.
- **High-Temperature Capability with Class IV or Class V Shutoff**—Use of multiple graphite piston rings (figure 1) permit Class IV shutoff up to 593°C (1100°F). Use of C-seal trim (see figure 5) permits Class V shutoff up to 593°C (1100°F).
- **Sour Service Capability**— Unless otherwise noted, references are to NACE MR0175-2002. Optional materials are available to meet NACE MR0103 and NACE MR0175 / ISO 15156. Material requirements under these standards vary by edition and year of issue; the specific standard must be specified.
- **Operating Economy**—Increased wear resistance provided by standard hardened stainless steel trim means long service life.
- **Maintenance Economy**—The valve body can stay in the pipeline during removal of trim parts. The EDR valve also features easy valve access without removing the actuator.

## Specifications

### Available Configurations

ED: Single-port, globe-style control valve with cage guiding, balanced valve plug, and push-down-to-close valve plug action (figure 1)

EAD: Angle version of ED control valve, used to facilitate piping or in applications where a self-draining valve is desired (figure 2)

EDR: Same as ED control valve except with push-down-to-open valve plug action (figure 3)

### Valve Sizes

See table 2

### End Connection Styles<sup>(1)(2)</sup>

#### Cast Iron Valves

*Flanged:* ED, NPS 1 through 8, ■ CL125 flat-face or ■ CL250 raised-face flanges per ASME B16.1

#### Steel and Stainless Steel Valves

*Flanged:* ■ CL150, 300, or 600 raised-face (RF) or ring-type joint (RTJ) flanges per ASME B16.5,

■ Raised-face (RF) flanges per EN1092-1/B

*Screwed or Socket Welding:* NPS 1 through 2, consistent with ASME B16.11

*Buttwelding:* NPS 1 through 8

Schedules 40 or 80 consistent with ASME B16.25

Socket weld end connection style is not available for EAD

Also, see table 2 and figures 12 and 13

### Maximum Inlet Pressures and Temperatures<sup>(1)(2)</sup>

As listed below, unless limited by maximum pressure drop or material temperature capabilities

#### Cast Iron Valves

*Flanged:* Consistent with CL125B or 250B per ASME B16.1

#### Steel and Stainless Steel Valves

*Flanged:* Consistent with CL150, 300, and 600<sup>(3)</sup> per ASME B16.34

*Screwed or Welding:* Consistent with CL600<sup>(3)</sup> per ASME B16.34

### Maximum Pressure Drop<sup>(2)</sup>

Same as maximum inlet pressure for specific construction defined above, except where further limited as follows:

All Valves Except Those with Whisper Trim III and WhisperFlo Cages: See figure 9

Valves with Whisper Trim III Cages : 0.999  $\Delta P/P_1$  maximum for levels A1 through D3

Valves for NACE MR0175 / ISO 15156 and MR0103: See figure 11

### Shutoff Classifications per ANSI/FCI 70-2 and IEC 60534-4

Class II: Standard with single graphite ring and 33 through 203 mm (1.3125 through 8-inch) port size

Class III: Optional for valves with single graphite piston ring and 87 mm (3.4375 inch) or larger port diameter

Class IV: For valves with multiple graphite piston rings and 111 mm (4.375 inch) or larger port diameter

Class V High-Temperature: For valves with port diameters from 73 through 203.2 mm (2.875 through 8-inch) with optional C-seal trim. See table 1

### Construction Materials

Valve Body, Bonnet, and Bonnet Spacer or Bottom Flange, if used: ■ Cast iron, ■ WCC carbon steel, ■ CF8M (cast 316 stainless steel), ■ LCC carbon steel, ■ WC9 chrome moly steel, ■ CF3M (cast 316L stainless steel) or ■ other materials upon request

#### Valve Plug, Cage, and Metal Seating Parts

All Valves Except Those with Whisper Trim III and WhisperFlo Cages: See table 3

Valves with Whisper Trim III and WhisperFlo Cages: See tables 4 and 5

Valves for NACE Specification: See table 10

Bellows Seal Assembly: ■ N06625/S31603 or ■ N06022/N06022

All Other Parts: See table 6

- continued -

Specifications (continued)

**Material Temperature Capabilities<sup>(2)</sup>**

**Valve Body/Trim Combinations**

*All Valves Except Those with Whisper Trim III and WhisperFlo Cages: See table 7*

*Valves with Whisper Trim III Cages: See table 4*

*Valves with WhisperFlo Cages (NPS 4 and 6 ED): See table 5*

*All Other Parts: See table 6*

**Flow Characteristics**

**Standard Cages:** ■ Quick-opening, ■ linear, or ■ equal percentage

**Whisper Trim and WhisperFlo Cages:** Linear

**Flow Directions**

**ED or EAD:** ■ Standard Cage--Normally down,

■ Whisper Trim and WhisperFlo Cages--Always up

**EDR:** ■ Standard Cage--Normally up, ■ Whisper Trim Cage--Always down

**Flow Coefficients and Noise Level Prediction**

See table 9 and Catalog 12

**Port Diameters and Valve Plug Travels**

See table 11

**Yoke Boss and Stem Diameters**

See table 11

**Typical Bonnet Styles**

■ Plain or ■ extension. See figures 12 and 13 for standard dimensions. See table 8 for selection guidelines

■ ENVIRO-SEAL bellows seal bonnet. See figure 12 for standard dimensions. See figure 7 for view of ENVIRO-SEAL bellows seal bonnet. Also, see Bulletin 59.1:070, ENVIRO-SEAL Bellows Seal Bonnets ([D101641X012](#)), for further information

**Packing Arrangements**

■ Single PTFE V-ring (standard), ■ double arrangements, ■ leak-off arrangements, ■ ENVIRO-SEAL packing system. See figure 6 for ENVIRO-SEAL configuration

*ENVIRO-SEAL Packing Systems in vacuum service:*

Standard ENVIRO-SEAL packing systems can be used in vacuum service with packing rings in standard orientation. Do not reverse the ENVIRO-SEAL PTFE packing rings. See Bulletin 59.1:061, ENVIRO-SEAL Packing Systems for Sliding-Stem Valves ([D101633X012](#)), for further information

**Approximate Weights**

NPS 1: 14 kg (30 lb)

NPS 1-1/2: 20 kg (45 lb)

NPS 2: 39 kg (85 lb)

NPS 2-1/2: 45 kg (100 lb)

NPS 3: 57 kg (125 lb)

NPS 4: 77 kg (170 lb)

NPS 6: 159 kg (350 lb)

NPS 8: 408 kg (900 lb)

**Optional Safety Instrumented System Classification**

SIL3 capable — certified by exida Consulting LLC

**Additional Options**

■ Seal welding of EDR valve body/bonnet joint for temperatures above 232°C (450°F), ■ lubricator, ■ lubricator/isolating valve, ■ drilled and tapped connection in extension bonnet for leak-off service, ■ valve body drain plug, ■ style 3 fabricated extension bonnet made on order to a specific length for cryogenic service, ■ style NS bonnet for seismic service requirements, ■ packings suitable for nuclear service, ■ C-seal trim for Class V high-temperature shutoff

1. EN (or other) ratings and end connections can usually be supplied; consult your [Emerson sales office](#).

2. The pressure/temperature limits in this bulletin and in any applicable standard limitations should not be exceeded.

3. Certain bonnet bolting material selections may require a CL600 easy-e valve assembly to be derated. Contact your Emerson sales office for more information.

4. Limitation based on excessive noise increases if max ΔP/P1 ratio for a given cage level is exceeded.

*Spring: ■ 17-7PH stainless steel or ■ N06600*

*Packing Box Flange: S31600*

*Packing Follower: S31600 lined with carbon-filled PTFE*

*Packing Box Studs: Strain-hardened 316 stainless steel*

*Packing Box Nuts: 316 stainless steel SA194 Grade 8M*

**Graphite ULF Packing Systems**

*Packing Ring: Graphite rings*

*Spring: ■ 17-7PH stainless steel or ■ N06600*

*Packing Box Flange: S31600*

*Packing Follower: S31600 lined with carbon-filled PTFE*

*Packing Box Studs: Strain-hardened 316 stainless steel*

*Packing Box Nuts: 316 stainless steel SA194 Grade 8M*

---

1. Refer to the valve specifications in this bulletin for pressure/temperature limits of valve parts. Do not exceed the pressure/temperature rating of the valve. Do not exceed any applicable code or standard limitation.  
2. The Environmental Protection Agency (EPA) has set a limit of 100 parts per million (ppm) for fugitive emissions from a valve in selected VOC (Volatile Organic Compound) services.  
3. In vacuum service, reversing the ENVIRO-SEAL PTFE packing rings is not necessary.

2. End connection EN1092-1/B.

## C-seal Trim Description

C-seal trim is available for valves with port diameters from 2.875 inches through 8 inches.

With C-seal trim, a balanced valve can achieve high-temperature, Class V shutoff. Because the C-seal plug seal is formed from metal (N07718 nickel alloy) rather than an elastomer, a valve equipped with the C-seal trim can be applied in processes with a fluid temperature of up to 593°C (1100°F).

## ENVIRO-SEAL and HIGH-SEAL Packing Systems

ENVIRO-SEAL and HIGH-SEAL packing systems offer exceptional sealing capabilities. They easily install in your existing valves or can be purchased with new valves. These systems may help prevent the loss of process fluid. The long operational life and reliability of

these systems also reduces your maintenance costs and downtime.

For applications requiring compliance with environmental protection regulations, the unique Fisher ENVIRO-SEAL packing system (figure 6) and a unique ENVIRO-SEAL bellows seal system (figure 7) are offered. The emission control packing system keeps emission concentrations below the EPA 100 ppm requirement.

For an excellent stem seal in applications that are not environmentally-sensitive, the Fisher HIGH-SEAL Graphite ULF packing system (figure 6) is offered. The HIGH-SEAL packing system provides excellent sealing at pressure/temperature ratings beyond ENVIRO-SEAL limits. ENVIRO-SEAL systems may also be applied for excellent stem sealing in higher pressure/temperature applications not requiring EPA compliance.

ENVIRO-SEAL packing systems, available with PTFE, Graphite ULF, or Duplex packing, and the HIGH-SEAL packing systems, Graphite ULF and graphite composite, feature live-loading and unique packing-ring arrangements for long-term, consistent sealing performance.

**Table 3. Typical Combinations of Metal Trim Parts<sup>(1)</sup> for all Valves Except Those for NACE Specification, Whisper Trim III, and WhisperFlo Cages**

Trim Designation	Valve Plug	Cage	Seat Ring	Liner (EAD Valve Only)

1. Lubricated nuts are standard.  
2. May be used down to -254°C (-425°F) if manufacturing process includes Charpy impact test.  
3. This minimum is due to thermal expansion differential between piston ring and cage at low temperatures.  
4. Except 427°C (800°F) on oxidizing service.  
5. Spring is used only with single PTFE V-ring packing; lantern ring replaces spring in other packings.  
6. Except 371°C (700°F) on oxidizing service.

Figure 9. Typical Trim Used for All Valves Except with Whisper Trim III Cage and WhisperFlo Cage

B1470-7

Notes:

- (1) Do not exceed the maximum pressure and temperature for the pressure rating of the valve material used, even though the trims shown may have higher capabilities.
- (2) Be especially careful to specify service temperature if trim 3 or 37 is selected, as different thermal expansion rates require special plug clearances. Specify trim 37H for temperatures above 210 °C (410 °F). Specify trim 3H for temperatures above 427 °C (800 °F).
- (3) Trim 29 may be used up to 103 bar (1500 psi) with clean, dry gas.
- (4) Use trim 27 instead of trim 29 for nonlubricating fluids such as superheated steam or dry gases between 149 and 316 °C (300 and 600 °F).

1. For metal trim parts only. Restricted trim and full-sized limits are the same.  
2. Same material also used for bottom flange, if required.  
3. May be used down to -254°C (-425°F) if manufacturing process includes Charpy impact test.  
4. Lubricating service allows usage to 316°C (600°F).  
5. Only available for Whisper Trim I cages.  
6. For Trim 3, upper temperature to 316°C (600°F) when used for Whisper Trim I cages.

**Table 8. Bonnet Selection Guidelines**

BONNET STYLE	PACKING MATERIAL	IN-BODY PROCESS TEMPERATURE LIMITS <sup>(1)</sup>	
		°C	°F
Plain: ■ Standard for all valves through NPS 6 valve body with 2-13/16 yoke boss diameter ■ Standard for NPS 6 and 8 valves in cast iron and WCC steel bonnet material with 3-9/16 yoke boss diameter	PTFE V-ring	-18 to 232	0 to 450
	PTFE/Composition	-18 to 232	0 to 450
	Graphite ribbon/filament	-18 to maximum shown in table 6	0 to maximum shown in table 6
Style 1 Cast Extension: ■ Standard for NPS 8 valves in S31600 bonnet material with 3-9/16 yoke boss diameter	PTFE V-ring	-46 to 427	-50 to 800
	PTFE/Composition		
	Graphite ribbon/filament	-46 to to maximum shown in table 6	-50 to maximum shown in table 6
Style 2 Cast Extension: ■ Optional for NPS 2 through 4 valves with 2-13/16 inch yoke boss diameter ■ Optional for NPS 6 and 8 valves with 3-9/16 yoke boss diameter	PTFE V-ring	-101 to 427	-150 to 800
	PTFE/Composition		
	Graphite ribbon/filament	-101 to maximum shown in table 6	-150 to maximum shown in table 6
ENVIRO-SEAL bellows seal bonnet	PTFE	For exceptional stem sealing capabilities. See Bulletin 59.1:070, ENVIRO-SEAL Bellows Seal Bonnets, for pressure/temperature ratings.	
	Graphite ULF		

1. These in-body process temperatures assume an outside, ambient temperature of 21°C (70°F) and no insulation on the bonnet. When using any packing at low process temperatures, a cast extension bonnet may have to be used to prevent packing damage which could result from the formation of valve stem frost. Material selection for trim and other components will also be limiting factors.

1. Refer Fisher Bulletin 80.1:010 Whisper Trim III (D100191X012) for more information.

Table 13. Bolting Materials and Temperature Limits for Compatibility with NACE MR0175-2002, NACE MR0175/ISO 15156, and NACE MR0103. Environmental restrictions may apply

VALVE BODY MATERIAL	BOLTING MATERIAL	TEMPERATURE CAPABILITIES					
		°C		°F			
		Min	Max	Min	Max		
Non-exposed bolting (Standard)							
WCC and CF8M (316 SST)	Studs	Steel SA-193-B7		-48 <sup>(2)</sup>	427	-55 <sup>(2)</sup>	800
	Nuts	Steel SA-194-2H					
Exposed bolting (Optional) Requires Derating of Valve <sup>(1)</sup> When These Body-to-Bonnet Bolting Materials are Used							
WCC and CF8M	Studs	Steel SA-193-B7M		-48 <sup>(2)</sup>	427	-55 <sup>(2)</sup>	800
	Nuts	Steel SA-194-2HM					

1. Derating is not required for CL300 valves. Derating may be required for valves rated at CL600. Contact your [Emerson sales office](#) for assistance in determining the derating of valves when these body-to-bonnet bolting materials are used.  
2. -29°C (-20°F) with WCC valve body material.

Figure 11. Typical Trim Used for NACE MR0175 / ISO 15156 and NACE MR0103. Environmental restrictions may apply

Notes:

- 1 Do not exceed the maximum pressure and temperature for the pressure rating of the valve material used, even though the trim shown may have higher capabilities.
- 2 Use trim 87 instead of trim 85 for nonlubricating fluids such as superheated steam or dry gases between 149 and 316°C (300 and 600°F).
